The Piper M350 is the only current production, pressurized, piston-engine aircraft available today. It leads the pack with the ability to fly up to 25,000 feet in pressurized cabin-class comfort on piston-engine economy. Safety features abound with the Garmin Enhanced Autopilot Flight Control System (AFCS) with Level Technology and Underspeed Protection maintaining positive control, a Hypoxia Recognition System with Automatic Decent Mode ensuring safety at high altitudes, on-board weather RADAR to positively navigate around convective weather, and more. A redesigned interior package with a host of cabin features, including an Iridium receiver enabling telephone calls, text messages and emails, make this M350 the pinnacle in an already proven and sought after airframe.
