The Piper Meridian is turbine power in its most refined form. With a reliable and proven Pratt & Whitney PT6A-42A engine mounted onto a frame built for both speed and agility, the Meridian cruises at speeds of up to 260 KTAS with ease. It climbs effortlessly up to altitude, and boasts responsive handling comparable to a sports car. The Piper Meridian is a true pilot's plane; and with the lowest fuel burn and acquisition cost in its class, it is a true value as well.
